What is this product?

Type	Allspring (Lux) Worldwide Fund (the "Fund") is a Societe d'Investissement à Capital Variable (SICAV) composed of several separate sub-funds organised under the laws of Luxembourg.
Term	The Fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the Fund, subject to approval by the Board of Directors.

Objectives	Allspring (Lux) Worldwide Fund - Climate Transition Global Equity Fund (the "Sub-Fund") seeks long-term capital appreciation. The Sub-Fund promotes environmental and/or social characteristics but does not have a sustainable investment objective. Under normal market conditions, the Sub-Fund invests at least two-thirds of its net assets in equity securities of companies of any market capitalisation located worldwide. The Sub-Fund invests in equity securities of issuers located in at least five different countries, including the U.S. The Sub-Fund may also invest up to 20% of its net assets in equity securities through ADRs, CDRs, EDRs, GDRs, IDRs and similar depositary receipts as well as equities denominated in US Dollars issued by Non-US Issuers. In terms of environmental characteristics, the Investment Manager will use a combination of data from providers that specialise in climate data and internal analysis to construct a portfolio of global companies that the Investment Manager believes are well positioned for a transition to a decarbonised economy by investing in companies identified as being aligned with an average global temperature increase of 2 degrees Celsius or less. The Investment Manager will target to decarbonise the Sub-Fund by 2050. This is intended to be achieved by initially setting a cap on the weighted average carbon intensity for the Sub-Fund that is lower than that of the MSCI All Country World Index. The cap will reduce along a trajectory that will decline in order to decarbonise the Sub-Fund by 2050. The Sub-Fund may also use futures, forward contracts, options, or swap agreements, as well as other derivatives, for hedging or efficient portfolio management purposes. Through the use of a negative screening process, the Sub-Fund seeks to exclude securities in accordance with its exclusion policy. A copy of the methodology and list of excluded investments (including the revenue thresholds) is available under allspringglobal.com. Shareholders may also request a copy from the Fund or the Management Company. The Investment Manager employs a systematic approach that combines quantitative tools and fundamental analysis to identify and evaluate companies exhibiting attractive valuation, quality and momentum characteristics. The Investment Manager aims to achieve positive excess returns relative to the MSCI All Country World Index through a disciplined portfolio construction process that combines active stock selection with holistic risk management. The Sub-Fund is actively managed but uses the MSCI All Country World Index as a reference for selecting investments and for performance comparison. The investments of the Sub-Fund may deviate significantly from the components of and their respective weightings in the benchmark. You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day"). This share class does not distribute dividends. Income is reinvested in the Sub-Fund.
Depository	Brown Brothers Harriman (Luxembourg) S.C.A.

Additional information	This document describes a share class of a sub-fund of Allspring (Lux) Worldwide Fund. The assets and liabilities of each sub-fund are segregated and no sub-fund is responsible for the liabilities of another. The prospectus and financial reports are prepared for Allspring (Lux) Worldwide Fund as a whole. You may obtain free copies of these documents in English, French, and German from Allspring (Lux) Worldwide Fund, c/o Brown Brothers Harriman (Luxembourg) S.C.A., 80 Route d'Esch, L-1470 Luxembourg or at allspringglobal.com. Price Publication: Net asset value per share is calculated on each Business Day and is available in local media and/or with the Fund's local agent in certain countries and at the registered office of the Fund.
Intended investor	This product is intended for investors of all knowledge and/or experience levels who are prepared to experience higher levels of volatility in pursuit of higher returns, who have an investment horizon of 5 years or longer and who have a risk tolerance compatible with the product's SRI rating.

What are the risks and what could I get in return?

Summary risk indicator

The risk indicator assumes you keep the product for 5 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you. We have classified this product as 4 out of 7, which is a medium risk class. This rates the potential losses from future performance at a medium level; and poor market conditions are very unlikely to impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.
